Washington 9, D. C.

Dear Dave -

I appreciate your and Murph's invitation to attend the Jason meeting last week. I had hoped to get in some of the time, but unfortunately events got in the way.

If there ever are any papers resulting from these meetings, I should be particularly interested in seeing those relative to the subjects covered by Slattery, Ferri and Dick Latter.

Sincerely,

Herbert Scoville, Jr.

Dear Pete:

We were sorry you couldn't come. As you know papers don't often stem directly from Jason meetings and, in addition, Ferri's talk was quite sculptural in quality and probably not*written in that manner.

Peterson talked for Latter and, should he write a paper, we would be happy to get a copy to you. As for Slattery, he did send a paper. It is "Effects of Body Shape on the Properties of the Turbulent Trail" by R. E. Slattery, W. G. Clay and M. A. Herlin, Lincoln Laboratory Ident. No. 1428-103 Series A. Upon inquiry, I find that it would take far less time if your people requested it directly.

Yours,

David A. Katcher
